Ethan Chen

954-459-1531 | ethanchen.5555@gmail.com | https://www.linkedin.com/in/chenethan11/ | github.com/chenethan123

Education

University of Florida — Gainesville, FL
B.S. in Computer Science, College of Liberal Arts and Sciences — *May 2030*

American Heritage Schools, Broward Campus — Plantation, FL
Relevant Coursework: AP Computer Science A, AP Calculus BC, AP Statistics — *Aug. 2022 – May 2026*

Technical Skills

Languages: Java, Python, C, JavaScript, HTML/CSS, Lua, Dart
Frameworks & Technologies: Flutter, Node.js, Express, Flask, REST APIs, SQLite, Supabase
Tools & Libraries: Git, GitHub, OpenAI API, pandas, NumPy, Matplotlib, OpenCV, Cursor, Claude Code

Experience and Leadership

Vice President and Web Developer — Aug. 2023 – May 2026
Bytes for Better Lives — *Plantation, FL*

- Led technology workshops serving 2,000+ seniors on mobile devices, computers, online safety, and digital communication
- Built and maintained the nonprofit's responsive website using HTML, CSS, and JavaScript
- Increased website impressions by 50% by improving volunteer and donation navigation

Service Worker and IT Support — Aug. 2022 – Jun. 2026
China Buffet II — *Miami, FL*

- Implemented and supported POS systems processing approximately $3,000 in daily transactions
- Troubleshot POS terminals, computers, cameras, and restaurant equipment to minimize operational disruptions
- Supported employees with technical issues and language barriers while assisting customer operations

Computer Science Track and Industry Experience — Aug. 2022 – May 2026
American Heritage Schools — *Plantation, FL*

- Completed an Accenture ethical-hacking workshop using Linux command-line tools, SSH, and port forwarding to investigate system vulnerabilities
- Participated in industry-focused projects at Microsoft spanning software development cybersecurity, and technical business proposal development

Projects

Exchange Lab | *Python, FastAPI, JavaScript, Yahoo Finance API, pytest* — Aug. 2026 – Current

- Built a simulated stock exchange with a price-time-priority limit order book supporting limit and market orders, partial fills, and cancellations
- Redesigned the order book using sorted price levels and FIFO queues, raising throughput 296x to 198K orders/sec with 5 μs average latency across 1M orders
- Built a live trading dashboard seeded with real Yahoo Finance quotes, allowing users to trade against different model bots

Distributed Compute Cluster | *Linux, Python, NFS, Prometheus, Grafana* — Jan. 2026 – May 2026

- Built a 5-node ARM compute cluster with 1 master and 4 worker nodes connected over Ethernet with shared NFS storage
- Implemented a distributed sorting system that partitioned 5M integers across 4 workers, achieving a 3.5× speedup over single-node execution
- Reduced runtime by 40% by profiling cluster performance with Prometheus and Grafana and batching workloads to minimize NFS round trips

Awards

FBLA – District Champion: Coding & Programming, Risk Management; State Finalist: Coding & Programming

Public Forum Debate – Ranked top 5% among 3,000+ teams; Yale semifinalist, State finalist, led debate to 2x state championships — 2025
